SUMMARY

Senior Business Transformation Analyst with extensive experience leading and optimizing large-scale projects for process efficiency and business growth. Proven track record reducing turnaround time by 30% through process re-engineering and delivering actionable insights via data analysis and visualization.

SKILLS

Languages: SQL, Python, HTML, JavaScript	Frameworks:
Databases: Oracle	Cloud / Tools: Microsoft Excel, Tableau, Power BI, MS Word, MS Suite, Outlook, Microsoft Visio,

EXPERIENCE

Senior Business Transformation Analyst · Verifone Mar 2025 – Present

- Developed and maintained Power BI dashboards to monitor operational metrics, ensuring data accuracy and timely delivery to executive stakeholders, supporting governance committees and strategic planning discussions.
- Conducted SQL-based data analysis and created Power BI visualizations to deliver actionable insights, supporting executive-level reporting and decision-making across multiple business units.
- Validated data integrity and reconciled discrepancies across multiple reporting sources, ensuring accurate and reliable reporting for operational reviews and governance committees.
- Collaborated with cross-functional teams to prioritize business and information needs, providing solutions to improve operations and reporting capabilities as identified by leadership.
- Created recurring executive-level KPI reports and presentations for operational reviews and strategic planning discussions, synthesizing complex performance results into clear, actionable recommendations.

Business Analyst · American Express (Amex) Feb 2024 – Feb 2025

- Led a process re-engineering project within the platform enhancement initiative, applying process improvement methodologies to streamline mortgage application workflows and reduce turnaround time by 30%
- Conducted feasibility and gap analysis to drive project decisions, enhancing processing speed by 20% through business transformation strategies
- Implemented a Requirement Traceability Matrix (RTM) for the Digital Mortgage platform, aligning deliverables with project goals to enhance accountability and support change management
- Collaborated with cross-functional teams including design, development, and QA using Jira to streamline functional requirements and leverage user stories, achieving a 25% reduction in project completion time
- Performed data analysis using SQL and Excel, leveraging Power BI and Tableau for data visualization to deliver insights and improve mortgage processing efficiency by 20%, increasing customer satisfaction by 15%
- Coordinated system integration testing and user acceptance testing (UAT) for the digital mortgage platform enhancement, aligning outputs with business requirements to reduce post-launch defects by 20%

Business Analyst · HSBC Jan 2019 – May 2022

- Led agile practices to enhance a mobile banking app, achieving a 20% reduction in development time through iterative sprints, supporting lean project management and continuous stakeholder feedback
- Utilized process improvement and change management techniques, leveraging UML diagrams with MS Visio to streamline workflows and achieve a 15% increase in efficiency
- Optimized user story management with Jira to enhance team effectiveness, contributing to captured project deliverables and timely completion across agile frameworks
- Managed stakeholder relationships to create comprehensive KPI reports and metrics for a mobile banking app enhancement, resulting in a 20% increase in funding and resource allocation

Business Analyst · Myntra Dec 2015 – Dec 2018

- Led business analysis and requirements gathering, reducing scope changes by 25% to optimize project outcomes
- Developed the business requirement document (BRD) with detailed use cases for last-mile delivery optimization, reducing scope gaps by 25% and accelerating project delivery by 15%
- Managed change management initiatives including risk analysis with cross-functional teams, enhancing project transition success through effective stakeholder communication and training
