## EXPERIENCE

**Senior Business Transformation Analyst** · Verifone Mar 2025 – Present

- Generated recurring reports and ad-hoc analysis using SQL, Excel, and Power BI to highlight key metrics, business trends, and performance drivers, translating complex insights into actionable recommendations for internal stakeholders.
- Created and maintained repeatable reporting processes, templates, and dashboards in Excel and Power BI to reduce manual work and improve consistency, providing clear charts, tables, and summaries that support decision-making.
- Applied data science and business analytics techniques to identify trends and performance drivers, leading a process re-engineering project that reduced turnaround time by 30% and improved operational efficiency.
- Collaborated with category subject matter experts and cross-functional teams to align reporting logic, business definitions, and data assumptions, ensuring accurate data collection, validation, and communication of business data.

**Business Analyst** · American Express (Amex) Feb 2024 – Feb 2025

- Led a process re-engineering project within the platform enhancement initiative, applying process improvement methodologies to streamline mortgage application workflows and reduce turnaround time by 30%
- Conducted feasibility and gap analysis to drive project decisions, enhancing processing speed by 20% through business transformation strategies
- Implemented a Requirement Traceability Matrix (RTM) for the Digital Mortgage platform, aligning deliverables with project goals to enhance accountability and support change management
- Collaborated with cross-functional teams including design, development, and QA using Jira to streamline functional requirements and leverage user stories, achieving a 25% reduction in project completion time
- Performed data analysis using SQL and Excel, leveraging Power BI and Tableau for data visualization to deliver insights and improve mortgage processing efficiency by 20%, increasing customer satisfaction by 15%
- Coordinated system integration testing and user acceptance testing (UAT) for the digital mortgage platform enhancement, aligning outputs with business requirements to reduce post-launch defects by 20%

**Business Analyst** · HSBC Jan 2019 – May 2022

- Led agile practices to enhance a mobile banking app, achieving a 20% reduction in development time through iterative sprints, supporting lean project management and continuous stakeholder feedback
- Utilized process improvement and change management techniques, leveraging UML diagrams with MS Visio to streamline workflows and achieve a 15% increase in efficiency
- Optimized user story management with Jira to enhance team effectiveness, contributing to captured project deliverables and timely completion across agile frameworks
- Managed stakeholder relationships to create comprehensive KPI reports and metrics for a mobile banking app enhancement, resulting in a 20% increase in funding and resource allocation

**Business Analyst** · Myntra Dec 2015 – Dec 2018

- Led business analysis and requirements gathering, reducing scope changes by 25% to optimize project outcomes
- Developed the business requirement document (BRD) with detailed use cases for last-mile delivery optimization, reducing scope gaps by 25% and accelerating project delivery by 15%
- Managed change management initiatives including risk analysis with cross-functional teams, enhancing project transition success through effective stakeholder communication and training
