## EXPERIENCE

**Senior Business Transformation Analyst** · Verifone Mar 2025 – Present

- Acted as system expert and product owner for the modernization of Commander Payments and Petro Gateway SaaS platforms, configuring commercial off-the-shelf applications, managing vendor relationships, and re-engineering business processes to improve efficiency and data visibility.
- Led UAT and rollout gates for the SaaS modernization, validating outcomes with test cases, transaction logs, and telemetry, coordinating defect triage, and ensuring high-quality delivery to stakeholders.
- Re-engineered mortgage application workflows within the American Express Digital Mortgage platform, applying process improvement methodologies to reduce turnaround time by 30% and enhancing data integration for reporting and visualization.
- Coordinated system integration testing and UAT for the digital mortgage platform, developing test scripts and scenarios, and aligning outputs with business requirements to reduce post-launch defects by 20%.
- Implemented agile practices to enhance the HSBC mobile banking app, reducing development time by 20% through iterative sprints, stakeholder collaboration, and continuous delivery of KPI dashboards for performance monitoring.

**Business Analyst** · American Express (Amex) Feb 2024 – Feb 2025

- Led a process re-engineering project within the platform enhancement initiative, applying process improvement methodologies to streamline mortgage application workflows and reduce turnaround time by 30%
- Conducted feasibility and gap analysis to drive project decisions, enhancing processing speed by 20% through business transformation strategies
- Implemented a Requirement Traceability Matrix (RTM) for the Digital Mortgage platform, aligning deliverables with project goals to enhance accountability and support change management
- Collaborated with cross-functional teams including design, development, and QA using Jira to streamline functional requirements and leverage user stories, achieving a 25% reduction in project completion time
- Performed data analysis using SQL and Excel, leveraging Power BI and Tableau for data visualization to deliver insights and improve mortgage processing efficiency by 20%, increasing customer satisfaction by 15%
- Coordinated system integration testing and user acceptance testing (UAT) for the digital mortgage platform enhancement, aligning outputs with business requirements to reduce post-launch defects by 20%

**Business Analyst** · HSBC Jan 2019 – May 2022

- Led agile practices to enhance a mobile banking app, achieving a 20% reduction in development time through iterative sprints, supporting lean project management and continuous stakeholder feedback
- Utilized process improvement and change management techniques, leveraging UML diagrams with MS Visio to streamline workflows and achieve a 15% increase in efficiency
- Optimized user story management with Jira to enhance team effectiveness, contributing to captured project deliverables and timely completion across agile frameworks
- Managed stakeholder relationships to create comprehensive KPI reports and metrics for a mobile banking app enhancement, resulting in a 20% increase in funding and resource allocation

**Business Analyst** · Myntra Dec 2015 – Dec 2018

- Led business analysis and requirements gathering, reducing scope changes by 25% to optimize project outcomes
- Developed the business requirement document (BRD) with detailed use cases for last-mile delivery optimization, reducing scope gaps by 25% and accelerating project delivery by 15%

- Managed change management initiatives including risk analysis with cross-functional teams, enhancing project transition success through effective stakeholder communication and training
